

GABRIEL PENTEADO

FULL STACK SOFTWARE ENGINEER

ABOUT ME

A dedicated front-end developer with solid knowledge in back-end technologies. One of my strongest qualities is my ability to effectively tackle and solve problems, a skill I honed through programming. Find more about me and all my projects in my **Portfolio**.

SKILLS & TOOLS

- HTML / CSS
- JavaScript
- React
- TypeScript
- TailwindCSS
- Next
- Redux
- Node
- Express
- Java
- Angular
- Vue
- MongoDB
- GraphQL
- Docker
- PostgreSQL
- Figma
- Git
- GitHub
- Spring

EDUCATION

- CS50 - Harvard University
- MOOC Java I & II - Helsinki University

LANGUAGES

- English
- Portuguese

WORK EXPERIENCE

100Devs *Full Stack Software Engineer* Jan 2024 - Present

- Developed responsive web applications using React, TypeScript, Node.js, MongoDB.
- Collaborated on user-friendly feature design for optimal performance and usability.
- Contributed to code reviews and ongoing development in front-end and back-end.

GAP digital *Full Stack Software Engineer* Feb 2021 - Present

- Developed full-stack client projects using technologies like React, TypeScript, Next, Java, Spring, PostgreSQL.
- Worked with clients to understand their needs and create user-friendly designs.
- Ensured optimal performance and code quality throughout the development process.

PROJECTS

Dental Procs

[youtube](#) [website](#) [github](#)

React - TypeScript - TailwindCSS - Node - Prisma - PostgreSQL

A specialized application designed for dentists to monitor the most performed procedures in their clinics and track performance trends over time.

- Complex data system implemented with Day.js library.
- Accessible design system using RadixUI library.
- Data validation with Zod library.
- Modern pie chart created with ApexCharts library.

Watch Store

[youtube](#) [website](#) [github](#)

Angular - RxJS - Angular Material UI - Sass

A modern watch store website created with React, Redux and TailwindCSS. Use Redux Toolkit for state management.

Oh My Donuts

[youtube](#) [website](#) [github](#)

Vite - Vue - Vuex - Sass

A Vue app designed for easily placing and managing donut orders, featuring reusable form components and custom SASS-styled buttons. It utilizes Vuex for smooth state management.

React Firebase Form

[youtube](#) [website](#) [github](#)

Vite - React - TypeScript - ChakraUI - Firebase

A registration form created with React and Typescript using React Hook-Form library for form validation. It's integrated with ChakraUI and with Realtime Database from Firebase.
